INDEX OF SUBJECTS

α-Aminobutyric acid:
Transport across the midgut of lepidopteran larvae (SACCHI, HANOZET and GIORDANA) **108**, 329
Absorption:
Of α-aminobutyric acid by the midgut of lepidopteran larvae (SACCHI, HANOZET and GIORDANA) **108**, 329
Acclimation:
Thermal, of frog and toad sartorius muscle (RENAUD and STEVENS) **108**, 57
— Thermal, of antarctic fish, effects on blood respiratory properties (TETENS, WELLS and DEVRIES) **109**, 265
— To high salt concentrations, effect on urea conservation in the toad (KATZ and BEN-SASSON) **109**, 373
Acetylcholine receptors:
On the cell body membrane of the fast coxal depressor motoneurone of the cockroach (DAVID and SATTELLE) **108**, 119
Acid-base regulation:
In carp exposed to environmental hypercapnia (CLAIBORNE and HEISLER) **108**, 25
— During prolonged hypoxia in freshwater turtles (JACKSON and HEISLER) **109**, 55
Acoustic telemetry:
Used to show visceral warming during digestion in bluefin tuna (CAREY, KANWISHER and STEVENS) **109**, 1
Action potential:
Generation of, in an echinoderm (TUFT and GILLY) **113**, 337
Active moments:
Of bull sperm flagella, as a function of temperature and viscosity (RIKMENSPOEL) **108**, 205
Active transport:
Of potassium ions, across the caterpillar midgut (THOMAS and MAY) **108**, 273, 293
— Of calcium in the mosquito larva, attenuation by lithium (BARKAI and WILLIAMS) **111**, 247
Activity:
Diurnal, effects of hypoxia in unoperated, unrestrained dogfish (METCALFE and BUTLER) **108**, 411
— Effect on blood volume in snakes (LILLYWHITE and SMITS) **110**, 267
Activity-dependent facilitation:
In *Aplysia*, a cellular mechanism for (HAWKINS) **112**, 113
Adrenalin:
Causes swelling of nucleated erythrocytes (NIKINMAA and HUESTIS) **113**, 215
***Aëdes aegypti*:**
Role of saliva in blood vessel location (RIBEIRO, ROSSIGNOL and SPIELMAN) **108**, 1
— Lithium attenuates active transport of calcium in the larva (BARKAI and WILLIAMS) **111**, 247
Aerial ventilation:
Muscular basis of, in an air-breathing teleost fish (LIEM) **113**, 1
Aerobic capacity:
Reduced, in thyroid-deficient lizards (JOHN-ALDER) **109**, 175
Aerodynamics:
Of dragonfly flight, phase relationships of forewings and hindwings (ALEXANDER) **109**, 379
***Agkistrodon piscivorus*:**
Foetal-maternal blood respiratory properties (BIRCHARD, BLACK, SCHUETT and BLACK) **108**, 247
Air breathing:
In fishes, effects of body size and aquatic hypoxia on *Synbranchus marmoratus* (GRAHAM and BAIRD) **108**, 357
Albacore:
Thunnus alalunga, effects of temperature on blood gas equilibria (CECH, LAURS and GRAHAM) **109**, 21
***Amblyomma hebraeum*:**
Neural control of salivary gland degeneration (HARRIS and KAUFMANN) **109**, 281
Ammonia:
Elimination by *Cyprinus carpio* after exposure to environmental hypercapnia (CLAIBORNE and EVANS) **108**, 25
Amphibia:
Characterization of an intermittent breathing pattern in *Xenopus laevis* (BOUTILIER) **110**, 291
Amphipod:
Corophium volutator, location of a circa-tidal pacemaker in (HARRIS and MORGAN) **110**, 125
Anoxia:
Prolonged, in freshwater turtles, role of pericardial fluid in acid buffering (JACKSON and HEISLER) **109**, 55
***Aplysia californica*:**
A cellular mechanism for conditioning (HAWKINS) **112**, 113
Antarctic fish:
Respiratory properties of blood and the effects of thermal acclimation (TETENS, WELLS and DEVRIES) **109**, 265
Antennal motor control:
A cuticular motor effect in the rock lobster (VEDEL) **111**, 145
Antidiuretic:
Action of CTSH on long-term fluid absorption across locust rectum (PROUX, PROUX and PHILLIPS) **113**, 409
Aquatic ventilation:
Muscular basis of, in an air-breathing teleost fish (LIEM) **113**, 1
Arachnid physiology:
Feeding and excretion in the scorpion (YOKOTA) **110**, 253

Arterial valve:
Neurohormonal modulation of cardiac outflow in the lobster (KURAMOTO and EBARA) **111**, 123
***Astacus leptodactylus*:**
Motor output depends upon load in walking (CRUSE and MÜLLER) **110**, 319
***Austropotamobius pallipes*:**
Ligand activity in clearance of metals from the blood (LYON, TAYLOR and SIMKISS) **113**, 19
Autotomy:
Of stick insect legs, generation of rhythmic flexion (BÄSSLER) **111**, 191
Axon:
Surface infolding and axon size can be quantitatively related in gastropod molluscs (LONGLEY) **108**, 163

Bat:
Correlation between structure and function in the design of the lung (MAINA and KING) **111**, 43
Behaviour:
Response of crayfish to extraretinal illumination (EDWARDS) **109**, 291
—Structural basis of, in crayfish (WINE) **112**, 283
—An intersegmental reflex in a crayfish (PAGE, GADALETA and IACOPINO) **113**, 109
—Evasive, of notodontid moths (SURLYKKE) **113**, 323
Behavioural tests:
To measure sound localization by unrestrained mice (EHRET and DREYER) **109**, 163
Bioluminescence:
Of photophores from *Porichthys notatus*, cyanide stimulation of luminescence and oxygen uptake (MALLEFET and BAGUET) **109**, 341
—In a deep-sea mysid, dietary maintenance (FRANK, WIDDER, LATZ and CASE) **109**, 385
Biomechanics:
Of frog muscle, effects of temperature (HIRANO and ROME) **108**, 429
Bird flight:
Momentum and energy in the wake of pigeon (SPEDDING, RAYNER and PENNYCUICK) **111**, 81
Blood:
Maternal, foetal and juvenile, respiratory properties in the cottonmouth (BIRCHARD, BLACK, SCHUETT and BLACK) **108**, 247
—Maternal and foetal, of *Embiotoca lateralis* (INGERMANN, TERWILLIGER and ROBERTS) **108**, 453
Blood-brain barrier:
Localization of, in *Periplaneta americana*, and recordings from neuroglia (SCHOFIELD, SWALES and TREHERNE) **109**, 307, 333; (SCHOFIELD and TREHERNE) **109**, 319
Blood flow:
Through the isolated, perfused gills of teleost fish (OLSON) **109**, 97
—Nervous regulation of, through dogfish gill (METCALFE and BUTLER) **113**, 253
Blood pressure:
In European eels, effects of calcitonin (WALES) **113**, 381
Blood volume:
Lability of, and relationship to activity and hypertension in snakes (LILLYWHITE and SMITS) **110**, 267
Blue marlin:
Makaira nigricans: power output and force-velocity relationship of red and white muscle fibres (JOHNSTON and SALAMONSKI) **111**, 171
Body size:
Effect on acceleration of a lizard (HUEY and HERTZ) **110**, 113
'Brackish-water' mosquito:
Larvae are osmoconformers (GARRETT and BRADLEY) **113**, 133
Brain development:
And behaviour in insects (FISCHBACH and HEISENBERG) **112**, 65
Brain mutants:
Effects on neurogenetics and behaviour in insects (FISCHBACH and HEISENBERG) **112**, 65
Breathing:
Intermittent, during amphibian diving (BOUTILIER) **110**, 291
***Bufo viridis*:**
Acclimation to hyperosmotic solution (KATZ, DEGANI and GABBAY) **108**, 403
—Effect of salt adaptation on chloride transport across skin (KATZ and LARSEN) **109**, 353
—Possible role of renal and urinary bladder in urea conservation (KATZ and BEN-SASSON) **109**, 373
Burst generation:
In autotomized legs of the stick insect (BÄSSLER) **111**, 191
Bursting neurones:
Activation of, in *Pleurobranchaea californica* (GILLETTE) **111**, 239

Calcitonin:
Vascular and renal effects on European eels (WALES) **113**, 381
Calcium:
Intraciliary concentration in *Paramecium*, effects of long- and short-term temperature changes (MARTINAC and MACHEMER) **108**, 179
—Fluxes in flounder heart muscle at low extracellular sodium chloride concentrations (GESSER and MANGOR-JENSEN) **109**, 201
—Metabolism of, in the embryos of an oviparous snake (PACKARD, PACKARD and GUTZKE) **110**, 99
—Attenuation of transport by lithium, in mosquito larvae (BARKAI and WILLIAMS) **111**, 247
—Storage in the haemolymph of a crab prior to moulting (SPARKES and GREENAWAY) **113**, 43
—Whole body flux rates in freshwater teleost fish (HÖBE, LAURENT and MCMAHON) **113**, 237
—Dependence of action potentials in leech giant salivary cells (MARSHALL and LENT) **113**, 367
—Role in photoreceptor pigment migration in a mutant fly (HOWARD) **113**, 471
Calcium channel:
In *Paramecium caudatum*, inhibition of, by W-7 (HENNESSEY and KUNG) **110**, 167

***Calliactis parasitica*:**
Two pathways exciting tentacle contractions (McFarlane) **108**, 137
—Reversal of direction of mucus-flow on the ciliated pharynx (Holley and Shelton) **108**, 151
***Carausius morosus*:**
Stopping and starting on a walking wheel (Dean and Wendler) **110**, 203
***Carcinus maenas*:**
Analysis of the scaphognathite ventilatory pump. I. Work and power (Mercier and Wilkens) **113**, 55
—Analysis of the scaphognathite ventilatory pump. II. Pumping efficiency and metabolic cost (Wilkens, Wilkes and Evans) **113**, 69
—Analysis of the scaphognathite ventilatory pump. III. Neuromuscular mechanisms (Mercier and Wilkens) **113**, 83
Cardiac filling:
In varanid lizards (Johansen and Burggren) **113**, 389
Cardiac ganglion:
In crabs, excitatory effects of dopamine (Miller, Benson and Berlind) **108**, 97
—In isolated lobster heart, effects of perfusion pressure (Kuramoto and Ebara) **109**, 121
Cardioexcitation:
By dopamine, in crabs (Miller, Benson and Berlind) **108**, 97
Cardiotoxin:
Selective permeability to, of fleshfly midgut (Fishman, Primor and Zlotkin) **108**, 441
Cardiovascular system:
Of *Octopus vulgaris* (O'Dor and Wells) **113**, 461
***Cardisoma carnifex*:**
Electrophysiology of a peptidergic neurosecretory system (Cooke and Haylett) **113**, 289
Catch:
Mechanical properties and control of, in spine ligaments of the sea urchin (Diab and Gilly) **111**, 155
Caterpillar:
See Manduca sexta
—*See also Spodoptera littoralis*
Cell death:
Hormonal control of, during muscle atrophy in a moth (Schwartz and Truman) **111**, 13
Cephalopod:
Octopus vulgaris, effects of reduced gill area on regulation of oxygen uptake and on metabolic scope (Wells and Wells) **108**, 393
—The visual system of *Nautilus pompilius* (Muntz and Raj) **109**, 253
***Cephaloscyllium isabella*:**
Effects of temperature on the oculomotor system (Montgomery and Paulin) **113**, 101
Cercal system:
Neurospecificity of, in the cercal system of the cricket (Murphey, Walthall and Jacobs) **112**, 7
***Chelydra serpentina*:**
Influence of environmental hydration on pattern of embryonic nitrogen excretion (Packard, Packard and Boardman) **108**, 195
Chemical synapse:
Between two motion detecting neurones in the locust brain (Rind) **110**, 143
Chemotaxis:
In the ciliated protozoon *Loxodes* (Fenchel and Finlay) **110**, 17
Chloride transport:
By toad skin, effect of salt adaptation (Katz and Larsen) **109**, 353
—Across the rectum of *Schistocerca gregaria* (Hanrahan and Phillips) **111**, 201
***Chrysemis picta bellii*:**
Contribution of pericardial fluid to acid buffering during prolonged anoxia (Jackson and Heisler) **109**, 55
Cicadas:
Tracheal gases, respiratory gas exchange, body temperature and flight (Bartholomew and Barnhart) **111**, 131
Cilia:
Beating patterns on the pharynx of a sea anemone (Holley and Shelton) **108**, 151
—Mechanical synchronization of, in ctenophore comb plates (Tamm) **113**, 401
Circadian rhythm:
Effect on wandering behaviour in larvae of *Manduca sexta* (Dominick and Truman) **110**, 35
***Clupea harengus*:**
Development of swimming movements and musculature in larvae (Batty) **110**, 217
Cockroach:
Ion transport in the midgut (Giordana, Sacchi and Zerahn) **113**, 487
—*See Periplaneta americana*
***Colubor constrictor*:**
Calcium metabolism of embryos (Packard, Packard and Gutzke) **110**, 99
Command neurone:
Role in the initiation of molluscan feeding (McCrohan) **113**, 351
—An inhibitory pathway in molluscan feeding (London and Gillette) **113**, 423
Conditioning:
Of a population of neurones, effect on ionic membrane currents (Alkon) **112**, 95
—In *Aplysia*, a cellular mechanism for (Hawkins) **112**, 113
Conduction velocity:
Relationship to axon surface infolding and axon size in gastropod molluscs (Longley) **108**, 163
Connective tissue:
Viscoelasticity of, in the body wall of sea cucumbers (Motokawa) **109**, 63
Contact-rehydration:
In the terrestrial slug *Limax maximus* (Prior) **111**, 63; (Prior and Uglem) **111**, 75
Contractile properties:
Of skeletal muscle from Pacific blue marlin (Johnston and Salamonski) **111**, 171
—Of skeletal muscle from a cold-temperature fish (Johnston and Sidell) **111**, 179
—Of iguana muscle, thermal dependence of (Johnston and Gleeson) **113**, 123

Contraction:
Of sea anemone tentacles, two excitatory pathways in sea anemones (McFarlane) **108**, 137
Contraction dynamics:
Of flight and stridulatory muscles of tettigoniid insects (Josephson) **108**, 77
Coordination:
Of legs, by a stick insect walking on a wheel (Dean and Wendler) **110**, 203
***Corophium volutator*:**
Location of a circa-tidal pacemaker in (Harris and Morgan) **110**, 125
Crab:
Excitatory effects of dopamine on cardiac ganglia (Miller, Benson and Berlind) **108**, 97
—Fiddler, the energetic cost of running sideways (Full and Herreid) **109**, 141
—*See Carcinus maenas*
—*See also Cardisoma carnifex*
Crayfish:
The structural basis of an innate behavioural pattern in the abdominal nervous system (Wine) **112**, 283
—*See Astacus leptodactylus*
—*See also Austropotamobius pallipes*
Cricket:
Neurospecificity in the cercal system (Murphey, Walthall and Jacobs) **112**, 7
Crustacean sinus gland:
Electrophysiology of a peptidergic neurosecretory system (Cooke and Haylett) **113**, 289
Ctenophores:
Mechanical synchronization of cilia within comb plates (Tamm) **113**, 401
CTSH:
Antidiurectic action on long-term fluid absorption across locust rectum (Proux, Proux and Phillips) **113**, 409
Cuticular vibration:
Of the cephalothorax of the rock lobster induces motor patterns in the antenna (Vedel) **111**, 145
***Cyprinus carpio*:**
Acid-base regulation, on exposure to environmental hypercapnia (Claiborne and Evans) **108**, 25

Decapod crustaceans:
Serotonergic innervation and modulation of stomatogastric ganglion (Beltz, Eisen, Flamm, Harris-Warwick, Hooper and Marder) **109**, 35
Diapause:
Role of juvenile hormone, in the flesh fly (Denlinger, Shukla and Faustini) **109**, 191
Digestion:
Visceral warming in bluefin tuna (Carey, Kanwisher and Stevens) **109**, 1
***Dipsosaurus dorsalis*:**
Thyroid deficiency reduces aerobic capacity and locomotory endurance (John-Alder) **109**, 175
—Thermal dependence of muscle contractile properties (Johnston and Gleeson) **113**, 123
Displacement sensitivity:
Of crayfish, neuronal and behavioural thresholds (Ebina and Wiese) **108**, 45
Diving:
Effects on aerobic metabolism and heart rate in penguins (Butler and Woakes) **108**, 419
—In *Xenopus laevis*, intermittent breathing pattern (Boutilier) **110**, 291
Dogfish:
See Cephaloscyllium isabella
—*See also Scyliorhinus canicula*
Dopamine:
Excitatory effects on crab cardiac ganglia (Miller, Benson and Berlind) **108**, 97
Dragonfly:
Unusual phase relationships between forewings and hindwings during flight (Alexander) **109**, 379
DUMETi stimulation:
Causing release of octopamine in an identified neurone (Moreton and Evans) **113**, 269

Ecdysone:
Role in pupal diapause in *Manduca sexta* (Bowen, Bollenbacher and Gilbert) **108**, 9
Ecdysteroid:
Role in controlling muscle atrophy in a moth (Schwartz and Truman) **111**, 13
Echinoderm nervous system:
Electrophysiology of *Ophiopteris papillosa* (Tuft and Gilly) **113**, 337
Eclosion hormone:
Role in controlling muscle atrophy in a moth (Schwartz and Truman) **111**, 13
Eel:
pH profile along the gut of *Anguilla anguilla* during seawater acclimation (Gilles-Ballien, Meister, Kirsch and Gillard) **113**, 483
Efficiency:
Of the scaphognathite ventilatory pump of a shore crab (Wilkens, Wilkes and Evans) **113**, 69
Electrical coupling:
Roles in neural circuits (Marder) **112**, 147
Electrical events:
During secretion by Malpighian tubules in *Rhodnius prolixus* (O'Donnell and Maddrell) **110**, 275
Electrical model:
For the blood-brain barrier of *Periplaneta americana* (Schofield and Treherne) **109**, 319
Electrogenic chloride transport:
Characterization of, across locust rectum (Hanrahan and Phillips) **111**, 201
Electrolytes:
In plasma and red cells of *Salmo gairdneri*, effect of temperature increases (Houston and Koss) **110**, 53
—In parotid saliva of sodium-replete red kangaroo (Beal) **111**, 225
Electrophysiology:
Of blood-brain barrier in *Periplaneta americana* (Schofield, Swales and Treherne) **109**, 307, 333; (Schofield and Treherne) **109**, 319

—Of isolated smooth muscle cells of *Mnemiopsis* (STEIN and ANDERSON) **110**, 329
—Of a peptidergic neurosecretory system in the crab (COOKE and HAYLETT) **113**, 289
—Of an echinoderm nervous system (TUFT and GILLY) **113**, 337
—Of leech giant salivary cells (MARSHALL and LENT) **113**, 367

Elephant seal:
Contribution of nasal countercurrent heat exchange to water balance (HUNTLEY, COSTA and RUBIN) **113**, 447

***Embiotoca lateralis*:**
Comparison of foetal and maternal blood oxygen affinities (INGERMANN, TERWILLIGER and ROBERTS) **108**, 453

Embryo:
Of snapping turtles, effects of environmental hydration on pattern of nitrogen excretion (PACKARD, PACKARD and BOARDMAN) **108**, 195
—Of an oviparous snake, calcium metabolism of (PACKARD, PACKARD and GUTZKE) **110**, 99

Embryogenesis:
Organization of neuropile during development (BASTIANI, PEARSON and GOODMAN) **112**, 45

Erythrocytes:
Effect of changes in P_{O_2} on deformability, in trout (HUGHES and KIKUCHI) **111**, 253
—Volume and pH changes induced by adrenalin (NIKINMAA and HUESTIS) **113**, 215

Evaporative water loss:
Measurement of, in a tenebrionid beetle (NICOLSON, LOUW and EDNEY) **108**, 477

Evolution:
Of vertebrates, gill ion exchange mechanisms evolved before vertebrates entered fresh water (EVANS) **113**, 465

Excretion:
Of nitrogen by embryonic snapping turtles, effect of environmental hydration (PACKARD, PACKARD and BOARDMAN) **108**, 195
—In the scorpion *Paruroctonus mesaensis* (YOKOTA) **110**, 253

Exercise:
In the fiddler crab, the energetic cost of running sideways (FULL and HERREID) **109**, 141

Extraretinal photoreception:
In crayfish, behavioural and motoneuronal responses to abdominal illumination (EDWARDS) **109**, 291

Facilitation:
Neuromuscular mechanisms of the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 83

Feedback:
In generation of motor pattern for 'fictive swimming' in lamprey (GRILLNER and WALLÉN) **112**, 337

Feeding:
Functional conflict with gas exchange in tadpoles of *Xenopus laevis* (FEDER, SEALE, BORAAS, WASSERSUG and GIBBS) **110**, 91
—And excretion in the scorpion (YOKOTA) **110**, 253
—Causes inactivation of nematocysts in *Hydra* (RUCH and COOK) **111**, 31
—Stimulation of chemosensory pathways and intracellular alkalinization mimic cAMP stimulation of endogenous bursting in command neurones (GILLETTE) **111**, 239
—Water flow patterns during prey capture by teleost fish (LAUDER and CLARK) **113**, 143
—Initiation of, in the snail (MCCROHAN) **113**, 351
—Functional controls and circuitry in an inhibitory pathway to command neurones in *Pleurobranchaea* (LONDON and GILLETTE) **113**, 423

Filiform hair sensory neurone:
In the cockroach, synapse with an identified giant interneurone (BLAGBURN, BEADLE and SATTELLE) **113**, 477

Flagella:
Of bull sperm, movements and active moments as a function of temperature and viscosity (RIKMENSPOEL) **108**, 205

Flesh fly:
See Sarcophaga crassipalpis
—*See also Sarcophaga falculata*

Flexor-tibiae muscle:
Generation of rhythmic flexion in autotomized stick insect legs (BÄSSLER) **111**, 191

Flight:
Of dragonflies, phase relationships of forewings and hindwings (ALEXANDER) **109**, 379

Flounder:
See Platichthys flesus

Gas exchange:
Functional conflict with feeding in tadpoles of *Xenopus laevis* (FEDER, SEALE, BORAAS, WASSERSUG and GIBBS) **110**, 91
—Role of the gills and branchiostegites in a bimodally breathing land crab (TAYLOR and GREENAWAY) **111**, 103

Gastropod:
Quantitative relationship between axon surface infolding and axon size (LONGLEY) **108**, 163

Genetic control:
Of behaviour in insects (FISCHBACH and HEISENBERG) **112**, 65

Geotaxis:
In the ciliated protozoon *Loxodes* (FENCHEL and FINLAY) **110**, 17

Giant interneurones:
In the cockroach, regeneration of (LEECH and TREHERNE) **110**, 311
—Synapses with a filiform hair sensory neurone in the terminal ganglion of the cockroach (BLAGBURN, BEADLE and SATTELLE) **113**, 477

Gills:
Isolated, from teleost fish, distribution of flow and plasma skimming (OLSON) **109**, 97
—Nervous regulation of blood flow through (METCALFE and BUTLER) **113**, 253

Glia:
Recordings from, in the blood-brain barrier of *Periplaneta americana* (SCHOFIELD, SWALES and TREHERNE) **109**, 307, 333; (SCHOFIELD and TREHERNE) **109**, 319

Gravity anomalies:
Effects on orientation of pigeons (LEDNOR and WALCOTT) **111**, 259

Haemoglobin:
Of albacore, effects of temperature on oxygen affinity (CECH, LAURS and GRAHAM) **109**, 21
Haemostasis:
Induced by saliva of feeding mosquitoes (RIBEIRO, ROSSIGNOL and SPIELMAN) **108**, 1
Hagfish:
Na^+/H^+ and Cl^-/HCO_3^- exchanges in gills (EVANS) **113**, 465
Hearing:
In notodontid moths (SURLYKKE) **113**, 323
Heart:
Of lobster, effects of perfusion pressure when isolated (KURAMOTO and EBARA) **109**, 121
—Muscle contractility and ^{45}Ca fluxes in flounder (GESSER and MANGOR-JENSEN) **109**, 201
Heart pericardial complex:
Role in urine formation in lamellibranchs (HEVERT) **111**, 1
Heat exchange:
Nasal, contribution to water balance in the northern elephant seal (HUNTLEY, COSTA and RUBIN) **113**, 447
Herring:
See Clupea harengus
Hippocampus:
Synchronization and local circuit interactions in (WONG, MILES and TRAUB) **112**, 169
***Hirudo medicinalis*:**
Initiation of swimming activity (BRODFUEHRER and FRIESEN) **108**, 341
—Identification of neurones through local ionic manipulation (FRIESEN and BRODFUEHRER) **113**, 455
***Hydra*:**
Inactivation of nematocysts during feeding (RUCH and COOK) **111**, 31
Hydrodynamics:
Of fast, continuous swimming in saithe and mackerel (VIDELER and HESS) **109**, 209; (HESS and VIDELER) **109**, 229
Hypercapnia:
Effect on acid-base regulation and ion transfers in carp (CLAIBORNE and EVANS) **108**, 25
Hypoxia:
Effect on respiration of *Xenopus laevis* tadpoles (FEDER and WASSERSUG) **108**, 231
—Aquatic, effect on air breathing by *Synbranchus marmoratus* (GRAHAM and BAIRD) **108**, 357
—Effect on activity and ventilation of unrestrained, unoperated dogfish (METCALFE and BUTLER) **108**, 411
—Acclimation to, in the lamprey (NIKINMAA and WEBER) **109**, 109
—Effect on deformability of trout erythrocytes (HUGHES and KIKUCHI) **111**, 253
—Acclimation to, effect on oxygen uptake and swimming performance of *Salmo gairdneri* (BUSHNELL, STEFFENSEN and JOHANSEN) **113**, 225

Induced power:
During slow forward flight in a pigeon (SPEDDING, RAYNER and PENNYCUICK) **111**, 81
Insect:
Tettigoniid, contractraction dynamics of flight and stridulatory muscles (JOSEPHSON) **108**, 77
Insect development:
In vitro studies of pupal diapause in *Manduca sexta* (BOWEN, BOLLENBACHER and GILBERT) **108**, 9
—Changes in neuronal circuits during metamorphosis (LEVINE) **112**, 27
Insect eye:
Early visual processing in (SHAW) **112**, 225
Insect midgut:
Transport of α-aminobutyric acid by (SACCHI, HANOZET and GIORDANA) **108**, 329
—Ion transport mechanisms in the cockroach (GIORDANA, SACCHI and ZERAHN) **113**, 487
Insect song:
Measurement of, by means of a particle velocity microphone (BENNET-CLARK) **108**, 459
Integration:
Of nerve impulses in the neuropile in crayfish (WINE) **112**, 283
Interneurones:
Local, and their interactions in arthropods (SIEGLER) **112**, 253
—Acting on snail neurosecretory neurones (BENJAMIN) **113**, 165
—Inhibitory, role in *Pleurobranchaea* feeding (LONDON and GILLETTE) **113**, 423
Intersegmental reflex:
Temporal and spatial spread in a crayfish (PAGE, GADALETA and IACOPINO) **113**, 109
Inulin space:
Used to investigate cardiovascular system of *Octopus vulgaris* (O'DOR and WELLS) **113**, 461
Ion regulation:
Gill Na^+/H^+ and Cl^-/HCO_3^- exchange evolved before vertebrates entered fresh water (EVANS) **113**, 465
—In cockroach midgut (GIORDANA, SACCHI and ZERAHN) **113**, 487
Ion-specificity:
Of excitability in regenerating cockroach giant interneurones (LEECH and TREHERNE) **110**, 311

Jellyfish:
Organization of central neurones in *Polyorchis penecillatus* (SPENCER and ARKETT) **110**, 69
Jumping:
Performance in frogs, effects of temperature (HIRANO and ROME) **108**, 429
Juvenile hormone:
Role in pupal diapause in the flesh fly (DENLINGER, SHUKLA and FAUSTINI) **109**, 191

Kidney:
In European eels, effects of calcitonin (WALES) **113**, 381
Kinematics:
Of rainbow trout, effect of size and swimming speed (WEBB, KOSTECKI and STEVENS) **109**, 77

—Of saithe and mackerel swimming (VIDELER and HESS) **109**, 209

Lactate:
During prolonged anoxia in freshwater turtles, buffering by alkaline pericardial fluid (JACKSON and HEISLER) **109**, 55

Lamellibranchs:
Ultrafiltration during urine formation (HEVERT) **111**, 1

***Lampetra fluviatilis*:**
Acclimation to hypoxia (NIKINMAA and WEBER) **109**, 109

Lamprey:
How does the central nervous system make the lamprey swim (GRILLNER and WALLÉN) **112**, 337
—Possible role of motoneurones in the spinal network generating the swimming rhythm (WALLÉN and LANSNER) **113**, 493
—*See Lampetra fluviatilis*

Land crab:
Holthuisana transversa: a change in the distribution of the respiratory circulation during air-breathing and water-breathing (TAYLOR and GREENAWAY) **111**, 103
—Storage of calcium in the haemolymph prior to moulting in *Holthuisana transversa* (SPARKES and GREENAWAY) **113**, 43

Laser microsurgery:
As a tool to study relationship between structure and function in neurones (MILLER and JACOBS) **112**, 129

Lateral line:
Role in stimulus localization by the African clawed toad (GÖRNER, MOLLER and WEBER) **108**, 315

Learning:
Causes changes in membrane currents (ALKON) **112**, 95

Leech:
See Hirudo medicinalis

Ligand binding:
In clearance of metal from crayfish blood (LYON, TAYLOR and SIMKISS) **113**, 19

Lithium:
Causes attenuation of active calcium transport in mosquito larvae (BARKAI and WILLIAMS) **111**, 247

Lizard:
See Dipsosaurus dorsalis
—*See also Stellio stellio*
—*See also Varanus exanthematicus*

Lobster:
See Nephrops
—*See also Panulirus japonicus*

Local interactions:
Between interneurones in arthropods (SIEGLER) **112**, 253

Locomotion:
Effects of body size and slope on acceleration of a lizard (HUEY and HERTZ) **110**, 113
—Of a stick insect, stopping and starting on a walking wheel (DEAN and WENDLER) **110**, 203
—Initiation of swimming in *Xenopus* embryos (ROBERTS, DALE and SOFFE) **112**, 321
—Fictive, in lamprey, motor patterns involved in generation of swimming patterns (GRILLNER and WALLÉN) **112**, 337
—Fictive, in lamprey, role of motoneurones (WALLÉN and LANSNER) **113**, 493

Locust:
See Locusta migratoria
—*See also Schistocerca gregaria*

***Locusta migratoria*:**
Chemical synapse between two motion detecting neurones in the brain of (RIND) **110**, 143

***Loxodes*:**
Geotaxis in (FENCHEL and FINLAY) **110**, 17

Lucifer Yellow photoinactivation:
Used to produce selective neuronal deletions for the study of neural circuits (MARDER) **112**, 147

Luciferin:
Role in bioluminescence of a deep-sea mysid (FRANK, WIDDER, LATZ and CASE) **109**, 385

Lung:
A morphometric study in the bat (MAINA and KING) **111**, 43

***Lymnaea stagnalis*:**
Properties of ventral cerebral neurones involved in the feeding system (MCCROHAN) **108**, 257
—Ionic basis of the resting potential in a cross-striated muscle (BREZDEN and GARDNER) **108**, 305
—Initiation of feeding (MCCROHAN) **113**, 351

Mackerel:
See Scomber scombrus

Magnetic remanence:
In the western Atlantic spiny lobster (LOHMAN) **113**, 29

Malpighian tubules:
Electrical events in, during secretion in *Rhodnius prolixus* (O'DONNELL and MADDRELL) **110**, 275

***Manduca sexta*:**
In vitro studies of pupal diapause (BOWEN, BOLLENBACHER and GILBERT) **108**, 9
—Active potassium ion transport across the midgut (THOMAS and MAY) **108**, 273, 293
—Physiology of wandering behaviour (DOMINICK and TRUMAN) **110**, 35

Mechanical properties:
Of holothurian body wall (MOTOKAWA) **109**, 63

Mechanics:
Of swimming in the muskrat (FISH) **110**, 183

Mechanosensitivity:
Of cilia in ctenophore comb plates (TAMM) **113**, 401

Membrane currents:
Changes during learning (ALKON) **112**, 95

Membrane potential:
Of *Paramecium*, effect of culturing and experimental temperature (MARTINAC and MACHEMER) **108**, 179

Metabolic cost:
Of the scaphognathite ventilatory pump of a shore crab (WILKENS, WILKES and EVANS) **113**, 69

Metabolic scope:
Effects of reduced gill area in *Octopus* (WELLS and WELLS) **108**, 393
Metabolism:
Aerobic, effects of diving in penguins (BUTLER and WOAKES) **108**, 419
— Aerobic and anaerobic, in the fiddler crab (FULL and HERREID) **109**, 141
— Ligand activity in clearance of metals from crayfish blood (LYON, TAYLOR and SIMKISS) **113**, 19
Metamorphosis:
In insects, changes occurring in neuronal circuits (LEVINE) **112**, 27
Microphone:
Particle velocity, for measuring the song of small insects (BENNET-CLARK) **108**, 459
Migration:
Of the western Atlantic spiny lobster, role of magnetic remanence (LOHMANN) **113**, 29
Mitochondria:
Power density of, related to specific power output of aerobic muscle (PENNYCUICK and REZENDE) **108**, 377
Molluscan feeding:
Involvement and properties of four identified cerebral neurones (MCCROHAN) **108**, 257
— Rhythmic and bilaterally coordinated motor activity in the isolated brain of *Pleurobranchaea californica* (LONDON and GILLETTE) **108**, 471
Morphometrics:
A study of structure and function in the design of the bat lung (MAINA and KING) **111**, 43
Mosquito:
See Aëdes aegypti
Mosquito larvae:
Osmoregulation in *Culiseta inornata* (GARRETT and BRADLEY) **113**, 133
Motion detection:
In the locust, a chemical synapse between two brain neurones (RIND) **110**, 143
Motoneurones:
Pharmacological properties of cholinergic receptors in *Periplaneta americana* (DAVID and SATTELLE) **108**, 119
— Identified, role in the feeding system of *Lymnaea stagnalis* (MCCROHAN) **108**, 257
— Responses to abdominal illumination in crayfish (EDWARDS) **109**, 291
— Possible role in the central pattern generator for swimming in the lamprey (WALLÉN and LANSNER) **113**, 493
Motor output:
In walking crayfish, depends on load (CRUSE and MÜLLER) **110**, 319
— Pattern, of the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 83
Motor rhythm:
In identified neurones involved in the feeding system of *Lymnaea stagnalis* (MCCROHAN) **108**, 257
— In the isolated brain of *Pleurobranchaea californica* (LONDON and GILLETTE) **108**, 471
— Induced in the antenna of the rock lobster by cuticular vibration on the cephalothorax (VEDEL) **111**, 145
— In molluscan feeding (MCCROHAN) **113**, 351
Motor systems:
In *Pleurobranchaea californica*, role of brain oscillators (DAVIS, KOVAC, CROLL and MATERA) **110**, 1
Moulting:
Storage of calcium in the haemolymph of a crab (SPARKES and GREENAWAY) **113**, 43
Mouse:
Sound localization by (EHRET and DREYER) **109**, 163
Movement:
Of bull sperm flagella, effect of temperature and viscosity (RIKMENSPOEL) **108**, 205
Mucus-flow:
Reversal of the direction, on the ciliated pharynx of a sea anemone (HOLLEY and SHELTON) **108**, 151
Muscle:
Long- and short-term temperature compensation in frogs and toads (RENAUD and STEVENS) **108**, 57
— Flight and stridulatory, contraction dynamics in tettigoniid insects (JOSEPHSON) **108**, 77
— Ionic basis of the resting potential in cross-striated heart muscle of *Lymnaea stagnalis* (BREZDEN and GARDNER) **108**, 305
— Relationship between power output and power density of mitochondria (PENNYCUICK and REZENDE) **108**, 377
— Temperature, effect on biomechanics in frog (HIRANO and ROME) **108**, 429
— Development of, in larval herring (BATTY) **110**, 217
— Hormonal control of atrophy in a moth (SCHWARTZ and TRUMAN) **111**, 13
— Power output and force-velocity relationship of red and white fibres from the Pacific blue marlin (JOHNSTON and SALAMONSKI) **111**, 171
— Temperature dependence of contractile properties in a cold-temperature fish (JOHNSTON and SIDELL) **111**, 179
— Of desert iguana, thermal dependence of contractile properties of (JOHNSTON and GLEESON) **113**, 123
— Extensor-tibiae of locust, release of octopamine by an identified neurone (MORETON and EVANS) **113**, 269
Muskrat:
See Ondatra zibethicus
Myogenic rhythm:
In the locust, inhibition by octopamine, 5-hydroxytryptamine and proctolin (EVANS) **110**, 231
Mysid:
Gnathophausia ingens, role of diet in maintaining bioluminescence (FRANK, WIDDER, LATZ and CASE) **109**, 385

***Nautilus pompilius*:**
The visual system (MUNTZ and RAJ) **109**, 253
Nematocysts:
Inactivation of, during feeding in *Hydra* (RUCH and COOK) **111**, 31

***Nephrops*:**
Method for studying statocyst-induced neurophysiological reflexes (MIYAN) **108**, 465
Nerve nets:
And conducting systems in sea anemones (MCFARLANE) **108**, 137
Neural control:
Of salivary gland degeneration in an ixodid tick (HARRIS and KAUFMANN) **109**, 281
Neuroembryology:
Organization of neuropile from embryonic fascicles to adult tracts (BASTIANI, PEARSON and GOODMAN) **112**, 45
Neurohormonal modulation:
Of cardiac outflow through the cardioarterial valve in the lobster (KURAMOTO and EBARA) **111**, 123
Neuromodulation:
In stomatogastric ganglion of decapod crustaceans (BELTZ, EISEN, FLAMM, HARRIS-WARWICK, HOOPER and MARDER) **109**, 35
Neuromuscular mechanisms:
In the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 83
Neuronal circuits:
In the leech, identification through local ionic manipulation (FRIESEN and BRODFUEHRER) **113**, 455
Neuronal interactions:
Mediated by neurally evoked changes in extracellular potassium concentration (SPIRA, YAROM and ZELDES) **112**, 179
Neuronal modelling:
To study relationship between structure and function in neurones (MILLER and JACOBS) **112**, 129
Neuronal oscillators:
In production of rhythmic cerebral and buccal motor output in *Pleurobranchaea californica* (DAVID, KOVAC, CROLL and MATERA) **110**, 1
— In the synchronization of cortical neurones (WONG, MILES and TRAUB) **112**, 169
Neurones:
Central, organization and radial symmetry of, in a jellyfish (SPENCER and ARKETT) **110**, 69
— In locust brain, a chemical synapse in motion detection (RIND) **110**, 143
— Changes occurring during insect metamorphosis (LEVINE) **112**, 27
Neuropile:
Organization of, from a developmental perspective (BASTIANI, PEARSON and GOODMAN) **112**, 45
Neurosecretion:
From crab sinus gland (COOKE and HAYLETT) **113**, 289
Neurosecretory cells:
In a snail interneuronal network (BENJAMIN) **113**, 165
Neurospecificity:
In the cricket cercal system (MURPHEY, WALTHALL and JACOBS) **112**, 7
Neurotransmitters:
Modulatory effects on synaptic transmission (PITMAN) **112**, 199
Non-spiking interneurones:
In arthropod nervous systems (SIEGER) **112**, 253
Notodontid moths:
A tympanic organ with a single auditory neurone (SURLYKKE) **113**, 323
Octopamine:
Mode of action on a locust myogenic rhythm (EVANS) **110**, 231
— Release from an identified neurone in the locust (MORTON and EVANS) **113**, 269
***Octopus vulgaris*:**
Effects of reduced gill area on regulation of oxygen uptake and metabolic scope (WELLS and WELLS) **108**, 393
— Circulation times, blood reserves and extracellular space (O'DOR and WELLS) **113**, 461
Oculomotor system:
In the dogfish, effects of temperature (MONTGOMERY and PAULIN) **113**, 101
***Ondatra zibethicus*:**
Mechanics, power output and swimming efficiency (FISH) **110**, 183
Orientation:
Of pigeons at gravity anomalies (LEDNOR and WALCOTT) **111**, 259
— Role of magnetic remanence in the western Atlantic spiny lobster (LOHMANN) **113**, 29
Osmoregulation:
By larvae of 'brackish-water' species of mosquito (GARRETT and BRADLEY) **113**, 133
— In the gut of the silver eel during seawater acclimation (GILLES-BALLIEN, MEISTER, KIRSCH and GILLARD) **113**, 483
Oxygen affinity:
Of foetal, juvenile and maternal blood from the cottonmouth (BIRCHARD, BLACK, SCHUETT and BLACK) **108**, 247
— Of foetal and maternal blood from the viviparous seaperch (INGERMANN, TERWILLIGER and ROBERTS) **108**, 453
— Of *Thunnus alalunga*, effects of temperature (CECH, LAURS and GRAHAM) **109**, 21
— Of blood from lampreys acclimated to hypoxia (NIKINMAA and WEBER) **109**, 109
Oxygen cycles:
Infradian, in pupal diapause in the flesh fly (DENLINGER, SHUKLA and FAUSTINI) **109**, 191
Oxygen transport:
In lampreys acclimated to hypoxia (NIKINMAA and WEBER) **109**, 109
— By blood of antarctic fish, the effects of thermal acclimation (TETENS, WELLS and DEVRIES) **109**, 265
Oxygen uptake:
Regulation of effects of reduced gill area in *Octopus* (WELLS and WELLS) **108**, 393
— Stimulation by cyanide, in photophores of *Porichthys notatus* (MALLEFET and BAGUET) **109**, 341
— In *Salmo gairdeneri*, effect of hypoxia acclimation (BUSHNELL, STEFFENSEN and JOHANSEN) **113**, 225

Pacemaker:
For endogenous tidal swimming pattern, location of, in an estuarine amphipod (HARRIS and MORGAN) **110**, 125

***Palinurus vulgaris*:**
Motor patterns induced in the antenna by cuticular vibration of the cephalothorax (VEDEL) **111**, 145
***Panulirus japonicus*:**
Effects of perfusion pressure on the isolated heart (KURAMOTO and EBARA) **109**, 121
—Neurohormonal modulation of the cardiac outflow through the cardioarterial valve (KURAMOTO and EBARA) **111**, 123
Paracellular pathway:
For water uptake during contact-rehydration in a terrestrial slug (PRIOR and UGLEM) **111**, 75
***Paramecium caudatum*:**
Effect of culturing and experimental temperature on electrical membrane properties (MARTINAC and MACHEMER) **108**, 179
—An anticalmodulin drug, W-7, inhibits the voltage-dependent calcium current (HENNESSEY and KUNG) **110**, 169
Penguins:
See Spheniscus humboldti
Perfusion pressure:
Effect on isolated lobster heart (KURAMOTO and EBARA) **109**, 121
Pericardial fluid:
Contribution to acid buffering during prolonged anoxia in freshwater turtles (JACKSON and HEISLER) **109**, 55
***Periplaneta americana*:**
Pharmacological properties of an identified motoneurone (DAVID and SATTELLE) **108**, 119
—Localization and study of the blood-brain barrier (SCHOFIELD, SWALES and TREHERNE) **109**, 307, 333; (SCHOFIELD and TREHERNE) **109**, 319
—Growth of excitability and ion-specificity of excitability in regenerating giant interneurones (LEECH and TREHERNE) **110**, 311
pH:
Effect on force-velocity characteristics of frog and toad sartorius muscle (RENAUD and STEVENS) **108**, 57
—In nucleated erythrocytes, changes induced by adrenergic swelling (NIKINMAA and HUESTIS) **113**, 215
—Effect on whole body calcium flux rates in freshwater teleost fish (HÖBE, LAURENT and MCMAHON) **113**, 237
—Profile along the gut of an eel during seawater acclimation (GILLES-BAILLIEN, MEISTER, KIRSCH and GILLARD) **113**, 483
Photophores:
Of *Porichthys notatus*, cyanide stimulation of oxygen uptake and luminescence (MALLEFET and BAGUET) **109**, 341
Photoreceptors:
In the eye of a mutant fly, migration of pigment granules (HOWARD) **113**, 471
Pigeons:
Orientation at gravity anomalies (LEDNOR and WALCOTT) **111**, 259
Pigment migration:
In the eye of a mutant fly, role of calcium (HOWARD) **113**, 471
Plasma skimming:
In isolated, perfused gills of three teleost fish (OLSON) **109**, 97
Plasma volume:
Relationship to locomotory activity in snakes (LILLYWHITE and SMITS) **110**, 267
***Platichthys flesus*:**
Contractility and ^{45}Ca fluxes in heart muscle (GESSER and MANGOR-JENSEN) **109**, 201
***Pleurobranchaea californica*:**
Rhythmic and bilaterally coordinated motor activity in the isolated brain (LONDON and GILLETTE) **108**, 471
—Brain oscillators underlying rhythmic cerebral and buccal motor output (DAVIS, KOVAC, CROLL and MATERA) **110**, 1
—Stimulation of chemosensory pathways and intracellular alkalinization mimic cAMP activation of endogenous bursting in feeding command neurones (GILLETTE) **111**, 239
—Functional controls and circuitry in an inhibitory pathway to feeding command neurones (LONDON and GILLETTE) **113**, 423
***Pollachius virens*:**
Kinematics and a dynamic analysis of fast, continuous swimming (VIDELER and HESS) **109**, 209; (HESS and VIDELER) **109**, 229
Potassium:
Transport across caterpillar midgut (THOMAS and MAY) **108**, 273, 293
—Effect of α-aminobutyric acid absorption by midgut of lepidopteran larvae (SACCHI, HANOZET and GIORDANA) **108**, 329
—Characterization of, across locust rectum (HANRAHAN and PHILLIPS) **111**, 201
—Extracellular, changes in concentration affecting neuronal interactions in *Periplaneta americana* (SPIRA, YAROM and ZELDES) **112**, 179
Power:
Output of aerobic muscle, related to power density of mitochondria (PENNYCUICK and REZENDE) **108**, 377
—Output, by swimming muskrat (FISH) **110**, 183
—Output, of skeletal muscle from Pacific blue marlin (JOHNSTON and SALAMONSKI) **111**, 171
—Output, of the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 55
Presynaptic neurones:
Identification in the leech, through local ionic manipulations (FRIESEN and BRODFUEHRER) **113**, 455
***Procambarus clarkii*:**
Comparison of neuronal and behavioural thresholds in the displacement-sensitive pathway (EBINA and WIESE) **108**, 45
—Behavioural and motoneuronal responses to extraretinal illumination (EDWARDS) **109**, 291
—Temporal and spatial spread of an intersegmental reflex (PAGE, GADALETA and IACOFINO) **113**, 109
Pronase injections:
Used to produce selective neuronal deletions for the study of neural circuits (MARDER) **112**, 147

Prothoracicotropic hormone:
Role in pupal diapause of *Manduca sexta* (Bowen, Bollenbacher and Gilbert) **108**, 9
Pulmonary mechanics:
In the lizard *Gekko gecko* (Milsom and Vitalis) **113**, 187; (Milsom) **113**, 203

Radial symmetry:
Of central neurones in a jellyfish (Spencer and Arkett) **110**, 69
Radiospaces:
In teleost fish (Höbe, Laurent and McMahon) **113**, 237
***Rana pipiens*:**
Jumping performance as a function of muscle temperature (Hirano and Rome) **108**, 429
Red kangaroo:
Electrolyte composition of parotid saliva (Beal) **111**, 225
Regeneration:
Of giant interneurones in the cockroach (Leech and Treherne) **110**, 311
Reptiles:
Pulmonary mechanics and work of breathing in a lizard (Milsom and Vitalis) **113**, 187
—Relationship between pulmonary mechanics and spontaneous breathing pattern in a lizard (Milsom) **113**, 203
Respiration:
Aerial *versus* aquatic in larvae of *Xenopus laevis* (Feder and Wassersug) **108**, 231
—In tropical cicadas (Bartholomew and Barnhart) **111**, 131
—Aquatic and aerial, muscular basis of, in a teleost fish (Liem) **113**, 1
—Pressure and water flow patterns in the fish respiratory tract (Lauder) **113**, 151
—Control of, in a lizard (Milsom) **113**, 203
Respiratory circulation:
A facultative change in the distribution of, in a bimodally breathing land crab (Taylor and Greenaway) **111**, 103
Respirometry:
Of swimming salps (Trueman, Bone and Braconnot) **110**, 323
Resting potential:
Ionic basis of, in cross-striated heart muscle of *Lymnaea stagnalis* (Brezden and Gardner) **108**, 305

Saithe:
See Pollachius virens
Saline:
Developed for neurophysiological studies of *Nephrops* (Miyan) **108**, 465
Saliva:
Role in blood vessel location by feeding mosquitoes (Ribeiro, Rossignol and Spielman) **108**, 1
—Electrolyte composition, in sodium-replete red kangaroo (Beal) **111**, 225
Salivary glands:
Neural control of degeneration in an ixodid tick (Harris and Kaufmann) **109**, 281
—Of the leech, calcium-dependence of action potentials in giant salivary cells (Marshall and Lent) **113**, 367
***Salmo gairdneri*:**
Effect of size and swimming speed on locomotor kinematics (Webb, Kostecki and Stevens) **109**, 77
—Effect of thermal acclimation on plasma and red cell ionic composition (Houston and Koss) **110**, 53
—Effects of changes in P_{O_2} on deformability of erythrocytes (Hughes and Kikuchi) **111**, 253
—Effect of hypoxia-acclimation on oxygen consumption and swimming performance (Bushnell, Steffensen and Johansen) **113**, 225
Salps:
Oxygen consumption during swimming by *Salpa fusiformis* (Trueman, Bone and Braconnot) **110**, 323
Salt adaptation:
Effect on chloride transport across toad skin (Katz and Larsen) **109**, 353
***Sarcophaga crassipalpis*:**
Involvement of juvenile hormone in pupal diapause (Denlinger, Shukla and Faustini) **109**, 191
***Sarcophaga falculata*:**
Selective permeability of the midgut to cardiotoxin (Fishman, Primor and Zlotkin) **108**, 441
***Schistocerca gregaria*:**
Mode of action of octopamine, 5-hydroxytryptamine and proctolin on a myogenic rhythm (Evans) **110**, 231
—Characterization of transport of KCl across the rectum (Hanrahan and Phillips) **111**, 201
—Release of octopamine from an identified neurone (Morton and Evans) **113**, 269
—Antiuretic action of CTSH on fluid absorption across recta (Proux, Proux and Phillips) **113**, 409
***Scomber scombrus*:**
Kinematics and a dynamic analysis of fast, continuous swimming (Videler and Hess) **109**, 209; (Hess and Videler) **109**, 229.
***Scyliorhinus canicula*:**
Effect of hypoxia on activity and ventilation (Metcalfe and Butler) **108**, 411
—Nervous regulation of gill blood flow (Metcalfe and Butler) **113**, 253
Sea anemone:
See Calliactis parasitica
Sea cucumber:
Viscoelasticity of body wall (Motokawa) **109**, 63
Seaperch:
See Embiotoca lateralis
Sea urchin:
Mechanical properties and control of non-muscular catch in the spine ligaments of *Strongylocentrotus franciscanus* (Diab and Gilly) **111**, 155
Secretion:
By Malpighian tubules of *Rhodnius prolixus* (O'Donnell and Maddrell) **110**, 275

Selective permeability:
Of fleshfly midgut to an orally toxic cobra venom (Fishman, Primor and Zlotkin) **108**, 441
Serotonin:
Role in initiation of swimming activity in the leech (Brodfuehrer and Friesen) **108**, 341
— Role in innervation and modulation of crustacean stomatogastric ganglion (Beltz, Eisen, Flamm, Harris-Warwick, Hooper and Marder) **109**, 35
— Mode of action on a locust myogenic rhythm (Evans) **110**, 231
Single cell:
Isolation and maintenance, from smooth muscle of *Mnemiopsis* (Stein and Anderson) **110**, 329
Size:
Effect on locomotor kinematics of rainbow trout (Webb, Kostecki and Stevens) **109**, 77
Smooth muscle:
Of *Mnemiopsis*, isolation, culture and electrophysiology of single cells (Stein and Anderson) **110**, 329
Snails:
An interneuronal network acting on neurosecretory neurones (Benjamin) **113**, 165
Snakes:
Lability of blood volume and relationship to activity and hypertension (Lillywhite and Smits) **110**, 267
Sound localization:
By unrestrained mice (Ehret and Dreyer) **109**, 163
***Spheniscus humboldit*:**
Heart rate and aerobic metabolism during dives (Butler and Woakes) **108**, 419
***Spodoptera littoralis*:**
Active potassium ion transport across the midgut (Thomas and May) **108**, 273, 293
Statocyst:
In lobsters, a method for neurophysiological studies (Miyan) **108**, 465
***Stellio stellio*:**
Effects of body size and slope on acceleration (Huey and Hertz) **110**, 113
Stick insect:
Walking on a wheel: stopping and starting (Dean and Wendler) **110**, 203
— Rhythmic flexion by autotomized legs of *Cuniculina impigra* (Bässler) **111**, 191
Stimulus localization:
By the African clawed toad (Görner, Moller and Weber) **108**, 315
Stomatogastric ganglion:
Of decapod crustaceans, serotonergic innervation and modulation of (Beltz, Eisen, Flamm, Harris-Warwick, Hooper and Marder) **109**, 35
Surface waves:
Localization of, by *Xenopus* sp. (Görner, Moller and Weber) **108**, 315
Swimming:
Locomotor kinematics of rainbow trout (Webb, Kostecki and Stevens) **109**, 77
— Of saithe and mackerel, kinematic analysis (Videler and Hess) **109**, 209
— Of saithe and mackerel, dynamic analysis of bending moments and muscle power (Hess and Videler) **109**, 229
— Location of the control centre for endogenous tidal rhythm of, in an estuarine amphipod (Harris and Morgan) **110**, 125
— Backwards, in *Paramecium*, inhibition of (Hennessey and Kung) **110**, 169
— Mechanics, power output and efficiency of, in the muskrat (Fish) **110**, 183
— Development of movement and musculature in larval herring (Batty) **110**, 217
— Oxygen consumption in swimming salps (Trueman, Bone and Braconnot) **110**, 323
— In *Xenopus* embryos after brief stimulation (Roberts, Dale and Soffe) **112**, 321
— Fictive, in the lamprey, role of motoneurones (Wallén and Lansner) **113**, 493
Synapse:
Versatility of (Pitman) **112**, 199
— In insect visual processing (Shaw) **112**, 225
— Identified, between a giant interneurone and a filiform hair sensory neurone in the cockroach terminal ganglion (Blagburn, Beadle and Sattelle) **113**, 477
Synaptic efficacy:
Relationship between neuronal structure and function (Miller and Jacobs) **112**, 129
— Changes mediated by neurally evoked variations in extracellular potassium concentration (Spira, Yarom and Zeldes) **112**, 179
Synaptic modulation:
By neurotransmitter substances (Pitman) **112**, 199
Synaptic transmission:
Mechanisms of action of neurotransmitters (Pitman) **112**, 199
Synchronization:
Of cortical neurones, role of local circuit interactions in the hippocampus (Wong, Miles and Traub) **112**, 169
***Synbranchus marmoratus*:**
Effects of body size and aquatic hypoxia on aerial gas exchange (Graham and Baird) **108**, 357

Tadpoles:
Of *Xenopus laevis*, aquatic *versus* aerial respiration (Feder and Wassersug) **108**, 231
— Of *Xenopus laevis*, functional conflicts between feeding and gas exchange (Feder, Seale, Boraas, Wassersug and Gibbs) **110**, 91
Tailflip escape behavoiur:
Structural basis of, in crayfish (Wine) **112**, 283
Teleost fish:
Distribution of flow and plasma skimming in isolated, perfused gills (Olson) **109**, 97
— *Myoxocephalus scorpius*, temperature dependence of muscle contractile properties and myofibrillar ATPase (Johnston and Sidell) **111**, 179

—Water flow patterns during prey capture (LAUDER and CLARK) **113**, 143
—Pressure and water flow patterns in the respiratory tract (LAUDER) **113**, 151
—Whole body calcium flux rates (HÖBE, LAURENT and MCMAHON) **113**, 237
Temperature:
Culturing and experimental, effect on electrical membrane properties of *Paramecium* (MARTINAC and MACHEMER) **108**, 179
—Effect on active moments and movements of bull sperm flagella (RIKMENSPOEL) **108**, 205
—Effect of plasma and red cell ionic composition in rainbow trout (HOUSTON and KOSS) **110**, 53
—Effect on respiration, gas exchange and flight of tropical cicadas (BARTHOLOMEW and BARNHART) **111**, 131
—Dependence of muscle contractile properties and myofibrillar ATPase in a cold-temperature fish (JOHNSTON and SIDELL) **111**, 179
—Effects of the dogfish oculomotor system (MONTGOMERY and PAULIN) **113**, 101
—Effect on contractile properties of iguana muscle (JOHNSTON and GLEESON) **113**, 123
Tenebrionid beetle:
Onymacris plana, measurement of evaporative water loss from (NICOLSON, LOUW and EDNEY) **108**, 477
Terrestrial slug:
Limax maximus, analysis of contact-rehydration (PRIOR) **111**, 63; (PRIOR and UGLEM) **111**, 75
Thresholds:
Neuronal and behavioural, in the displacement-sensitive pathway of crayfish (EBINA and WIESE) **108**, 45
***Thunnus thynnus*:**
Visceral warming during digestion (CAREY, KANWISHER and STEVENS) **109**, 1
Thyroid:
Deficiency reduces aerobic capacity and locomotory endurance in lizards (JOHN-ALDER) **109**, 175
Tick:
See Amblyomma hebraeum
Toad skin:
The effect of salt adaption on chloride transport (KATZ and LARSEN) **109**, 353
Tracheal gases:
During pre-flight warm-up and flight in tropical cicadas (BARTHOLOMEW and BARNHART) **111**, 131
Transducer:
In a particle velocity microphone for the song of small insects (BENNET-CLARK) **108**, 459
Transepithelial ion transport:
In the caterpillar midgut (THOMAS and MAY) **108**, 273, 293
Transglutaminase:
Role in catch mechanism of sea urchin spine ligaments (DIAB and GILLY) **111**, 155
Tritiated water:
Used to measure evaporative water loss of a tenebrionid beetle (NICOLSON, LOUW and EDNEY) **108**, 477
Tunafish:
See Albacore
—*See also Thunnus thynnus*
Turtle:
See Chelydra serpentina
—*See also Chrysemys picta belli*

***Uca pugilator*:**
The energetic cost of running sideways (FULL and HERREID) **109**, 141
Ultrafiltration:
During urine formation in lamellibranchs (HEVERT) **111**, 1
Urea:
Influx across isolated toad skin, effect of acclimation to hyperosmotic solution (KATZ, DEGANI and GABBAY) **108**, 403
—Hypertonic, quantitive effects on disruption of the blood-brain barrier in *Periplaneta americana* (SCHOFIELD, SWALES and TREHERNE) **109**, 333
—Conservation, possible role of renal and urinary bladder in the toad (KATZ and BEN-SASSON) **109**, 373
Urine:
Composition in toads after acclimation to high levels of salt (KATZ and BEN-SASSON) **109**, 373
—Ultrafiltration during formation of, in lamellibranchs (HEVERT) **111**, 1

***Varanus exanthematicus*:**
Venous return and cardiac filling (JOHANSEN and BURGGREN) **113**, 389
Venous return:
In varanid lizards (JOHANSEN and BURGGREN) **113**, 389
Ventilation:
Power and work output of the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 55
—Pumping efficiency and metabolic cost of the scaphognathite ventilatory pump of a shore crab (WILKENS, WILKES and EVANS) **113**, 69
Vibration receptors:
In the leech, role in initiating swimming (BRODFUEHRER and FRIESEN) **108**, 341
Viscoelasticity:
Of holothurian body wall (MOTOKAWA) **109**, 63
Vision:
In the cephalopod *Nautilus pompilius* (MUNTZ and RAJ) **109**, 253
—Early visual processing in insects (SHAW) **112**, 225
Voltage-clamp:
Used in investigating pharmacological properties of cholinergic receptors of an identified insect motoneurone (DAVID and SATTELLE) **108**, 119
Vortex wake:
Of a pigeon in slow forward flight (SPEDDING, RAYNER and PENNYCUICK) **111**, 81

W-7
An anticalmodulin drug which inhibits the voltage-dependent calcium current in *Paramecium caudatum* (HENNESSEY and KUNG) **110**, 169

Walking:
Stopping and starting by a stick insect (DEAN and WENDLER) **110**, 203
—A new method for measuring leg position in crayfish (CRUSE and MÜLLER) **110**, 319
Wandering behaviour:
In *Manduca sexta*, temporal organization and role of internal and external environments (DOMINICK and TRUMAN) **110**, 35
Warm-bodied fish:
Effects of temperature on blood gas equilibria in the albacore (CECH, LAURS and GRAHAM) **109**, 21
Water balance:
In the scorpion *Paruroctonus mesaensis* (YOKOTA) **110**, 253
—In the terrestrial slug *Limax maximus* (PRIOR) **111**, 63
—Contribution of nasal countercurrent heat exchange in northern elephant seal (HUNTLEY, COSTA and RUBIN) **113**, 447
Water flow:
During prey capture by teleost fish (LAUDER and CLARK) **113**, 143
—In the respiratory tract of teleost fish (LAUDER) **113**, 151
Water uptake:
Diminished in toads acclimated to hyperosmotic solutions (KATZ, DEGANI and GABBAY) **108**, 403
—During contact-rehydration in the terrestrial slug *Limax maximus* (PRIOR and UGLEM) **111**, 75
Work:
Produced by the scaphognathite ventilatory pump of a shore crab (MERCIER and WILKENS) **113**, 55
—Of breathing, and pulmonary mechanics in a lizard (MILSOM and VITALIS) **113**, 187

***Xenopus laevis*:**
Aerial *versus* aquatic respiration of tadpoles (FEDER and WASSERSUG) **108**, 231
—Lateral line input and stimulus localization (GÖRNER, MOLLER and WEBER) **108**, 315
—Functional conflicts between feeding and gas exchange (FEDER, SEALE, BORAAS, WASSERSUG and GIBBS) **110**, 91
—Intermittent breathing pattern during diving (BOUTILIER) **110**, 291
—Sustained swimming in embryos after brief stimulation (ROBERTS, DALE and SOFFE) **112**, 321
